Overview

Versatile Power for Demanding Tasks

This variable speed impact drill is engineered for high-performance drilling across wood, metal, and masonry applications. Featuring a robust motor and ergonomic soft-grip handle, it ensures both power and user comfort during extended operation. The inclusion of dual-mode selection and variable speed control allows for precise adjustments, making it a reliable tool for professional environments.

Technical Specifications

Performance Metrics

650 W

Power

2800 RPM

Max Speed

Power Input	650 W
Voltage/Frequency	230V~50Hz
No-Load Speed	2800 min-1
Impact Rate	44800 min-1

Drilling Capacity

Drilling Capacity by Material

Material	Capacity
Steel	10mm
Concrete	13mm
Wood	25mm

Features

Key Features

- Variable speed control
- Reversible rotation
- Dual-mode selection (Impact/Drill)
- Lock-on button for continuous use
- Soft grip handle

Certifications

CE, Protection Class II
