

Variable Speed Impact Drill

This impact drill is designed for drilling into various materials, including wood, metal, and concrete. It features a variable speed control for precision drilling and a powerful motor for demanding tasks.

Overview

Professional Impact Drill

This robust variable speed impact drill is engineered for versatility across wood, metal, and concrete applications. Featuring a powerful 710W motor and precise speed control, it ensures consistent performance for demanding professional tasks. The ergonomic design and integrated depth gauge facilitate accurate, comfortable operation for extended use.

Technical Specifications

Input Power	710 W
Voltage/Frequency	230V~50Hz, 120V~60Hz

Performance Metrics

Drilling Performance

2800 rpm
No-load Speed

44800 bpm
Impact Rate

Capacity

Max Drilling Capacity

Material	Capacity
Steel	13mm
Concrete	13mm
Wood	25mm

Features

Key Features

- Variable speed control
- Depth gauge included
- Ergonomic handle design
- Reverse function for screw removal
- Keyed chuck

Chuck Size	13 mm
