

Variable Speed Impact Drill

This impact drill is a versatile power tool designed for drilling into various materials, including wood, metal, and concrete. It features a robust motor and variable speed control for precision and adaptability to different tasks.

Overview

Professional Impact Drill

This variable speed impact drill is engineered for high-performance drilling tasks across wood, metal, and concrete. Featuring a robust 800W motor and precise speed control, it offers the versatility required for both professional construction and demanding DIY projects. The ergonomic design ensures comfortable handling, while the durable construction ensures reliability on the job site.

Technical Specifications

Rated Input Power

800 W
Power

Voltage / Frequency	230-240V / 50Hz
No Load Speed	2800 rpm
Chuck Size	13 mm

Logistics & Packaging

Weight (G.W/N.W)	24kg / 23.5kg
Packing Size	41 x 30 x 50 cm
20ft Container Capacity	4600

Accessories & Compliance

Included Accessories

- Side handle
- Depth gauge
- Chuck key

Certifications	CE, GS, EMC, ROHS, PAHS
