

Variable Speed Jigsaw

This jigsaw is designed for cutting various materials with precision. It features a robust motor, variable speed control, and an adjustable base for bevel cuts.

Overview

Professional Variable Speed Jigsaw

This high-performance jigsaw is engineered for precision cutting across diverse materials including wood and steel. Featuring a robust 710W motor and a 4-stage pendulum action, it offers exceptional control and efficiency for demanding tasks. The ergonomic design incorporates low-vibration technology and a separated speed regulator, ensuring comfortable handling and accurate results for professional applications.

Performance

Input Power	710 W
No-load Speed	800-3000/min
Pendulum Settings	4

Cutting Capacity

Cutting Capacity

80 mm Wood Capacity	8 mm Steel Capacity
-------------------------------	-------------------------------

Electrical

Voltage/Frequency Options	230V/50Hz, 120V/60Hz
---------------------------	----------------------

Features

Key Features

- Variable speed control
- Low vibration design
- 4-stage pendulum action
- Separated speed regulator
