

Variable Speed Rotary Tool Kit with LCD Display

This rotary tool kit is designed for a variety of DIY and professional tasks. It features variable speed control, an ergonomic grip, and an LCD screen for speed settings.

Product Overview

Versatile Rotary Tool Kit

This professional-grade rotary tool kit features an integrated LCD display for precise speed control ranging from 8,000 to 35,000 rpm. Designed for versatility, it is an ideal solution for cutting, grinding, polishing, engraving, and sanding various materials. The 170W motor combined with an ergonomic grip ensures consistent performance for both DIY enthusiasts and trade professionals.
