

Variable Speed Wood Lathe

This precision-engineered wood lathe is designed for both woodworking enthusiasts and professionals. Its variable speed control allows for precise adjustments to suit different wood types and project requirements.

Product Overview

Precision Woodworking Performance

The MCW12 Variable Speed Wood Lathe is a precision-engineered tool designed to meet the demands of both woodworking enthusiasts and professionals. Featuring a robust construction for stability, this lathe offers variable speed control to accommodate diverse wood types and project requirements. With a 550W motor and a digital speed display, it provides the power and real-time feedback necessary for consistent, high-quality turning results.

Technical Specifications

Spindle Speed

350 rpm

Min Speed

3500 rpm

Max Speed

Motor Power	550 W
Swing Diameter	305 mm
Centre Height	127 mm
Working Length	405 mm

Logistics & Physical

Container Loading Quantity

Container Type	Quantity
20' Container	190
40' Container	390

Net Weight	31 kg
Gross Weight	34 kg
Packing Dimensions	890 x 385 x 405 mm

Compliance

Certifications	CE
