Overview

Precision Woodworking Performance

The MCW12/2 is a versatile variable-speed wood lathe engineered for both professional and hobbyist woodworking applications. Featuring a 550W motor and a 3-step variable speed system, it offers precise control for a wide range of turning projects. Its robust construction ensures stability and durability, making it an essential tool for crafting high-quality turned wood products.

Technical Specifications

Motor Power	550 W
Swing Diameter	305 mm
Centre Height	152 mm
Working Length	455mm (expandable to 1000mm)

Performance

Variable Speed Ranges

- 450-1100 rpm
- 960-2400 rpm
- 1400-3500 rpm

Key Performance Metrics

3500 rpm

Max Spindle Speed

3 levels

Speed Steps

Logistics

Container Loading Capacity

Container Type	Quantity (pcs)
20 ft	217
40 ft	448
40 ft HQ	512

Weight	35 kg
Packing Dimensions	845 x 475 x 330 mm
