

Variable Temperature Steam Iron with Self-Cleaning Function

This steam iron features variable temperature control, optimal for various fabric types. A self-cleaning function maintains performance, while vertical steam and spray functions offer versatile garment care.

Product Overview

Professional Garment Care

This versatile variable temperature steam iron is engineered for high-performance fabric care. Featuring a durable stainless steel soleplate, it ensures a smooth glide across a wide range of materials including silk, cotton, wool, and linen. Integrated safety and maintenance features, such as automatic shut-off and self-cleaning, make this an ideal solution for consistent, reliable performance in professional environments.

Functional Features

Operation Controls

- Adjustable Temperature Control
- Dry Ironing Mode
