

Variable Temperature Steam Iron

This steam iron is designed for efficient garment care. It features variable temperature settings and adjustable steam output.

Product Overview

Professional Garment Care

The DR2038 steam iron is engineered for efficient and effective garment care, featuring a durable soleplate designed for a smooth glide over various fabrics. With adjustable temperature and steam settings, it caters to everything from delicate synthetics to heavy linens. This iron prioritizes user safety and convenience by incorporating auto-shutoff capabilities, an ergonomic design, and a self-cleaning system for maintenance longevity.
