

# Vase-Shaped Ceramic Space Heater

This vase-shaped ceramic space heater provides efficient localized warming with its compact and stylish design. It features multiple operating modes and a safety grill for secure operation.

## ADDITIONAL IMAGES

## Product Overview

### Elegant Space Heating Solution

This vase-shaped ceramic space heater combines aesthetic grace with high-efficiency performance. Engineered with a powerful PTC heating element and an aluminum propeller, it ensures quiet and rapid warmth distribution. Designed for safety, the unit includes comprehensive overheating and tip-over protection, making it an ideal choice for localized heating needs.

## Performance & Features

Heating Technology	High-efficiency PTC ceramic
Available Settings	Cold Air, Warm Air, Hot Air
Noise Level	Low-noise aluminum propeller design
Safety Cooling Cycle	15-second fan delay to dissipate residual heat

## Safety & Compliance

### Safety Mechanisms

- Dual overheating protection
- Thermal cut-off
- Incline/Tip-over cut-off
- Fire-retardant housing

Material Specifications	Imported high-temperature resistant fire-retardant plastic
-------------------------	--

## Operational Controls

User Interface	Soft touch panel with intuitive settings
Heat Distribution	Yes
