

VDE Insulated Screwdriver Set

This VDE insulated screwdriver set is designed for electrical work, providing protection up to 1000V AC. Each screwdriver features an ergonomic handle for a comfortable grip and precise control.

Product Overview

Professional Electrical Safety

This VDE insulated screwdriver set is engineered for professional electrical work, offering guaranteed protection up to 1000V AC. Each tool is constructed from high-durability CR-V steel with insulation molded directly onto the blade for a secure, permanent bond. Designed for comfort and efficiency, the handles feature a soft-grip cushion core that provides 40% more torque than conventional alternatives.
