

VDE Standard Power Cord for European Appliances

This power cord is suitable for various electric appliances compliant with VDE standards. It features a European VDE plug for reliable power connectivity.

Product Overview

Professional European Power Connectivity

This high-quality European standard power cord is engineered for safety and reliability, featuring a two-pole design without earthing contact and IP44 splash-proof protection. Compliant with VDE0620 and IEC60884 international standards, this model is perfectly suited for a wide range of household and professional kitchen appliances. With a robust 16A/250V capacity, it provides a stable power solution for demanding international electrical environments.
