Product Overview

Innovative Vehicle Anti-Theft Solution

This advanced security device is designed to deter theft by rapidly filling a vehicle's interior with a dense, non-toxic fog upon unauthorized entry. It integrates seamlessly with vehicle alarm systems to provide an effective visual barrier, quickly impairing an intruder's visibility. Compact and easily installed, the system protects your property without leaving residue or causing damage to vehicle interiors.

Technical Specifications

Dimensions	75mm (L) x 27mm (W) x 15mm (H)
Weight	50 g
Operating Voltage	11-90V DC
Operating Temperature	-20°C to +65°C

Connectivity & Tracking

Connectivity Standards	GSM, GPRS, TCP/IP
Tracking Sensitivity	-165 dBm
Location Accuracy	< 10 meters CEP

Key Features

Operational Functions

- Remote start fog activation
- Vibration detection and tracking
- Power failure alarm
- Remote oil supply cut-off
- Electronic fence alarm
- Fake base station prevention
