

Vehicle Data Logging Camera

This is a high-performance driving recorder for comprehensive vehicle data logging and monitoring. It is ideal for fleet management, accident reconstruction, and driver behavior analysis.

Product Overview

High-Performance Vehicle Data Logging

The PR2038 is a high-performance driving recorder designed for comprehensive vehicle data logging and monitoring. It features real-time data acquisition, storage, and analysis capabilities, making it an essential tool for fleet management and accident reconstruction. This device provides accurate and reliable vehicle operation information to support driver behavior analysis and operational safety.

Core Functionality

Primary Functions

- Real-time data acquisition
- Secure data storage
- Comprehensive data analysis
- Reliable vehicle operation logging

Applications

Target Use Cases

Fleet Management, Accident Reconstruction, Driver Behavior Analysis, Vehicle Monitoring

Device Identification

Model Number

PR2038
