

Vehicle Data Recorder with Digital Display

This vehicle data recorder features a digital display for showing recorded data. It uses a suction cup mount and appears to have a slot for data storage, possibly an SD card, designed for monitoring and recording vehicle activity.

Product Overview

Professional Vehicle Traveling Data Recorder

This vehicle traveling data recorder is engineered to provide precise monitoring and recording of vehicle activities. Designed with a compact form factor and an integrated digital display, it allows for real-time visibility of critical metrics such as speed, time, and location. It serves as an essential tool for fleet management, safety monitoring, and logistics optimization.

Hardware Features
