

Vehicle Diagnostic Interface Cable for VAG

Diagnostic interface cable designed for Volkswagen Automotive Group (VAG) vehicles. It facilitates communication with the vehicle's onboard diagnostic system, enabling users to read diagnostic trouble codes and access live data.

Product Overview

Professional Vehicle Diagnostic Interface

The VAG908 diagnostic interface is a professional-grade tool designed for in-depth diagnostics on Volkswagen Automotive Group vehicles. It enables users to read diagnostic trouble codes, access live data streams, and perform advanced adaptations. Designed for efficiency, this tool supports modern communication protocols for comprehensive vehicle maintenance and troubleshooting.

Technical Specifications

Supported Interfaces	HEX, KEY, Micro-CAN
Diagnostic Protocols	UDS, ODX, ASAM

System Requirements

Compatible Operating Systems

- Windows 2000
- Windows XP
- Windows Vista
- Windows 7

Usage Guidelines
