

# Vehicle GPS Tracking Device

This GPS tracking device is designed for vehicle tracking and monitoring. It features real-time location updates and geofencing capabilities for fleet management and asset tracking applications.

## Product Overview

### High-Precision Vehicle Tracking

This GPS positioning terminal is engineered for professional fleet management and asset tracking applications. It provides real-time location updates and reliable data access to help businesses improve operational efficiency and security. With advanced features like geofencing, it offers a robust solution for monitoring vehicle movements.

## Core Features

### Capabilities

Real-time Tracking, Geofencing, Remote Data Access, Fleet Management, Asset Tracking

## Technical Specifications

### Primary Application

Vehicle Tracking • Fleet Monitoring

### Model Identifier

NET114
