

Vehicle LED Emergency Warning Light Head

This LED light head is designed for vehicle emergency lighting applications. It features multiple LEDs to provide a bright warning signal.

Overview

High-Intensity Emergency Warning Solution

The LTD624M is a high-intensity LED light head engineered specifically for vehicle emergency lighting applications. It utilizes an advanced LED configuration to deliver a bright, attention-grabbing signal that significantly enhances visibility in critical situations. Designed for reliability, the unit features a durable housing and energy-efficient operation, making it an ideal choice for various emergency vehicles and warning systems.

Technical Specifications

Light Source	High-intensity LED
Wiring	Multi-wire configuration for multiple functions
Key Performance Benefits	Long Life, Low Power Consumption, High Visibility

Construction

Suitable Applications

- Emergency vehicles
- Warning systems

Housing	Durable housing
