

Vehicle Recovery Rope 19000 lbs Capacity

This recovery rope has 30% elasticity. It is lighter and has better strength than steel rope.

Product Overview

High-Performance Vehicle Recovery

This heavy-duty recovery rope is designed for demanding towing and recovery applications, offering a superior 30% elongation factor. Providing better elasticity than standard nylon snatch straps, it effectively absorbs the energy required for safe vehicle extraction. The construction ensures durability and reliability, making it a preferred choice for professional towing services and off-road recovery.
