

Vehicle Recovery Tow Rope with Steel Hooks

This tow rope is designed for vehicle recovery and towing applications. Constructed from high-strength woven nylon webbing, it offers durability and reliable performance for emergency towing situations.

Product Overview

Heavy-Duty Recovery Solution

This high-strength recovery tow rope is engineered for reliability in emergency vehicle towing situations. Constructed from durable, high-tenacity polyester webbing, it features reinforced stitching at all critical stress points to ensure maximum longevity. The included forged steel hooks come with integrated safety latches, providing a secure and rapid attachment for cars, SUVs, and trucks.
