

Vehicle Shock Absorber

This shock absorber enhances vehicle stability and ride comfort. It features robust construction with a durable spring and hydraulic damping system to minimize vibrations.

Product Overview

High-Performance Vehicle Shock Absorber

Engineered for both on-road and off-road applications, this shock absorber offers superior control and enhanced vehicle stability. The design features a robust construction integrated with a hydraulic damping system to minimize vibrations effectively. Experience a smoother, more comfortable driving experience thanks to advanced damping technology.

Quality Certifications

ISO 9001, SGS Certified

Technical Specifications

Suitable Terrain

- On-road
- Off-road
- 4x4 Vehicles

Construction Details

Heavy-duty Spring • Hydraulic System • Vibration Dampening

Damping System

Hydraulic Damping
