

Vehicle Shock Absorber with Adjustable Damping

This high-performance shock absorber enhances vehicle stability and ride comfort. It features a coil spring and adjustable damping for optimal performance in various driving conditions.

Product Overview

High-Performance Damping Solution

This vehicle shock absorber is engineered to provide superior ride comfort and enhanced vehicle stability. Equipped with advanced adjustable damping and a robust coil spring, it is designed to deliver optimal performance across diverse driving environments. Built with high-grade, durable materials, this unit ensures long-lasting reliability for aftermarket applications.

Technical Specifications

Damping Type	Adjustable
Internal Gas	Nitrogen
Safety Compliance	High Pressure, Do Not Disassemble

Application

Compatible Systems

- Vehicle suspension systems
- Aftermarket rack systems
