

Vehicle Traction Ramp for Mud, Sand, and Snow

This traction ramp is designed to help vehicles escape from sand, mud, or snow. It features tapered cones for superior tire grip and reinforced beams for supporting vehicles.

Product Overview

Reliable Recovery Solution

The Vehicle Traction Ramp is an essential recovery tool engineered for vehicles stuck in challenging terrains such as mud, sand, and snow. Featuring a durable construction with tapered cones, these ramps provide superior grip to tires, facilitating quick and efficient vehicle extraction. Designed for versatility, they include reinforced beams for 4WD support and integrated features for easy handling and secure recovery.

Key Features

Traction Mechanics

- Tapered cones for superior tire grip
- Ends shaped for easy insertion and digging
- Reinforced beams for structural support

Usability Features

- Six integrated hand holds
- Holes designed for connecting recovery straps

Compatibility & Use

Vehicle Compatibility

4WD Vehicles • Light Vehicles

Suitable Environments

Mud, Sand, Snow, Off-road
