

Vehicle Undercarriage Inspection Platform with Lighting

Vehicle undercarriage inspection system featuring a platform with integrated lighting and wheel chocks. The system allows for detailed visual inspection of the car's underbody.

Overview

Professional Undercarriage Inspection System

This vehicle undercarriage inspection platform is designed to provide clear, unobstructed views of a vehicle's underbody, including the exhaust system, suspension, and drivetrain components. Featuring integrated high-visibility lighting and robust safety wheel chocks, it ensures that maintenance and repair procedures are both efficient and accurate. This system is an essential tool for workshops aiming to enhance inspection quality and safety.

Technical Specifications

Key Features

- Integrated high-intensity lighting system
- Built-in vehicle wheel chocks
- Durable heavy-duty construction
- Optimized for underbody component visibility

Target Applications

Vehicle Maintenance • Repair Shops • Undercarriage Diagnostics

Safety Features

Wheel Chocks, Anti-Slip Design, Stable Platform
