Vehicle Washing Pressure Cleaner

This pressure cleaner is designed for car washing and care. It features a van-shaped housing with a connected hose and nozzle for pressurized cleaning.

Product Overview

High-Efficiency Vehicle Washing Solution

This vehicle washing pressure cleaner is designed for effective dirt and grime removal, making it an essential tool for automotive diagnostics and maintenance. Engineered for precision, the system delivers consistent high-pressure performance to ensure a thorough cleaning experience for all vehicle surfaces. With versatile voltage options and a comprehensive accessory kit, it meets the demanding requirements of professional car care environments.

Technical Specifications

Performance Metrics

65 Bar	40 °C
Max Pressure	Max Water Temp

Model Configurations

Item No.	Voltage	Power	Flow Rate
QX-CS100	100V	1200	330L/H
QX-CS120	120V	1300	330L/H
QX-CS230	230V	1500	350L/H

Water Feed Requirements	0.2-0.4 Mpa

Accessories & Usage

Standard Accessories

- Spray gun
- Snake hose cleaner
- Turbo lance
- HPC for connector
- Detergent bottle
- Wrench
