

Velcro Backing Pad for Polishing Discs

This backing pad is designed for polishing and sanding discs. It provides support and even pressure distribution for consistent results across automotive, woodworking, and metalworking applications.

Product Overview

Professional Backing Pad

This high-quality backing pad is engineered for optimal performance with polishing and sanding discs. It features a durable construction designed for long-lasting reliability in demanding environments. The secure Velcro attachment system ensures quick and efficient disc changes, making it an essential tool for consistent results across various professional applications.

Applications

Suitable Industries

Automotive, Woodworking, Metalworking

Features

Performance Features

- Durable construction for long-lasting performance
- Secure Velcro attachment system
- Quick and easy disc changes
- Even pressure distribution
