

Vent-Free Ceramic Gas Log Set

Vent-free gas log set designed for fireplace use. It provides supplemental heat and a realistic flame.

Product Overview

Natural Comfort and Realistic Flame

This vent-free ceramic gas log set provides a realistic flame appearance, creating a warm, comfortable, and elegant atmosphere in any living space. Engineered for high efficiency and cost-effective heating, the unit utilizes convection heat radiation to provide natural warmth. The system features advanced safety mechanisms, including an automatic cut-off device and high-temperature resistant construction.
