

Vented Circular Plastic Cover for Chemical Equipment

This circular cover protects internal components of chemical equipment. It is made from durable, chemical-resistant plastic and features slotted vents for airflow.

Product Overview

Industrial Vented Cover

This durable, circular plastic cover is specifically engineered for chemical equipment and machinery. Featuring a precision-slotted concentric vent pattern, it facilitates essential airflow and cooling while protecting sensitive internal components from environmental contaminants. Designed for industrial longevity, the cover includes integrated mounting points for secure installation in demanding chemical processing environments.

Technical Specifications

Suitable Applications

- Chemical processing machinery
- Industrial equipment protection
- Ventilation and cooling systems

Material Composition	Chemical-resistant plastic
Key Design Features	Vented Design, Concentric Pattern, Chemical Resistant, Industrial Grade
Mounting Points	2 holes
