

# Ventilated HDPE Safety Helmet

This high-density polyethylene (HDPE) safety helmet meets CE EN 397 standards. Ventilation holes enhance breathability and comfort, while an adjustable chin strap ensures a secure fit.

## Product Overview

### Professional Safety Protection

This high-density polyethylene (HDPE) safety helmet is engineered for reliability in demanding industrial and construction environments. It features a 6-point suspension system and integrated ventilation holes to ensure long-term wearer comfort and breathability. Designed to meet CE EN 397 safety standards, it includes an adjustable chin strap and a secure, customizable fit for various head sizes.

## Technical Specifications

### Safety Standard

CE EN 397

### Shell Material

High-Density Polyethylene (HDPE)

### Head Size Adjustment

54-63 cm

### Suspension System

6 points

## Design & Features

### Included Accessories

- Adjustable chin strap
- Chin protector
- Foam cushion sweatband
- Universal slot for ear muffs

### Color Options

White, Blue, Yellow, Red, Orange, Green

### Ventilation

Yes

## Maintenance & Usage

### Usage and Care

The helmet should be worn with the peak facing forward and adjusted via the rear serrated roller for a secure fit. Inspect daily for cracks or flaws; replace immediately if the helmet sustains a strong shock, even if damage is not visible. Store in a cool, dry place away from direct sunlight, chemicals, and frost.
