

Ventilated Stainless Steel Refrigerated Counter

This ventilated refrigerated counter is made of stainless steel and includes multiple ingredient containers on top. It features digital temperature control and an efficient cooling system for commercial kitchen use.

Product Overview

Professional Refrigeration Solution

This ventilated stainless steel refrigerated counter is engineered for the high-demand environments of commercial kitchens and food preparation areas. It features a robust stainless steel construction that ensures durability and ease of sanitation for food safety compliance. Integrated with an efficient cooling system and precise digital temperature control, it provides reliable performance and organized storage for essential ingredients.

Technical Specifications

Construction Material	Stainless Steel
Cooling System	Ventilated
Temperature Control	Digital

Features

Key Features

- Durable stainless steel construction
- Ventilated refrigeration system
- Digital temperature management
- Integrated ingredient container setup

Usage

Recommended Applications

Commercial Kitchens • Food Preparation Areas
