

Ventilation and Exhaust Fan with Metal Frame

This high-performance fan is designed for both ventilation and exhaust applications. It features aerodynamically optimized blades for efficient airflow and quiet operation, encased in a robust metal frame with a protective grille.

Product Overview

High-Performance Ventilation Solution

This electrical fan is engineered for versatile ventilation and exhaust applications across industrial, commercial, and residential environments. It features a robust metal frame construction paired with a protective grille, ensuring long-term durability and operational safety. The unit utilizes aerodynamically optimized blades designed to deliver efficient airflow while maintaining quiet operation.

Technical Specifications

Suitable Environments

Industrial • Commercial • Residential

Key Performance Features

- Aerodynamically optimized blades
- Quiet operation
- High-performance ventilation
- Safety-focused design

Construction Materials

Metal Frame, Protective Grille
