

Ventilation Exhaust Fan

This electrical exhaust fan is designed for ventilation purposes. It removes stale air and odors from indoor spaces.

Overview

High-Efficiency Ventilation Solution

This electrical exhaust fan is engineered to provide reliable air circulation and odor removal for indoor environments. Featuring a durable white housing and an integrated automatic shutter mechanism, it ensures optimal airflow when in operation while maintaining a clean appearance when idle. Designed for seamless integration into residential or commercial spaces, this unit significantly improves indoor air quality by efficiently extracting stale air.

Technical Specifications

Primary Application

Indoor Ventilation • Odor Removal

Housing Material	Plastic
Color	White
Mechanism	Automatic Shutter, Electrical
