

Ventilation Fan Component with Red Indicator

This component is designed for ventilation fans. It features a curved, padded design with vertical grooves and a central, oval-shaped red indicator.

Product Overview

Professional Ventilation Component

This high-quality electrical component is specifically engineered for integration into air conditioning and ventilation systems. Featuring a durable, smooth synthetic construction, it includes a distinctive red indicator for quick status identification. Its rectangular, grooved design ensures optimal airflow management and seamless installation in professional HVAC settings.

Visual Indicators

Red status indicator

Physical Characteristics

Material

Smooth synthetic material

Design Features

Rectangular shape, Vertical grooves, Curved profile, Padded design

Application

Intended Use

- Air conditioning systems
- Ventilation equipment
- Exhaust fan assemblies
