

Vernier Caliper for Precision Measurement

This vernier caliper is used for precision measurement. It provides accurate readings for quality control, engineering, and machining.

Product Overview

Precision Measurement Tool

This vernier caliper is engineered for high-accuracy measurement tasks in professional environments. Constructed with a durable stainless steel body and a corrosion-resistant zinc alloy head and shell, it ensures long-term reliability. The device features an interchangeable magnetic strip film scale that provides clear, permanent visibility for precise readings.

Construction & Materials

Body Material	Stainless Steel
Head & Shell Material	Zinc Alloy

Features

Durability Features Rust Resistant • Fade Resistant Scale	
Scale Technology	Interchangeable, Magnetic Strip Film
