

Vertical Airflow Tower Fan

This freestanding tower fan is designed for circulating air in a room. The fan features a slim, vertical design with horizontal vents along the front to direct airflow.

Product Overview

High-Efficiency Vertical Airflow

This vertical airflow tower fan is engineered to provide optimal air circulation for professional and commercial environments. Featuring a slim, space-saving design, it integrates seamlessly into office or workspace layouts. The unit includes intuitive manual controls for precise airflow adjustments and sits on a pedestal base to ensure steady operation and maximum stability.
