

Vertical Airflow Tower Fan

This tower fan provides efficient air circulation in a slim, space-saving design. It features multiple speed settings controlled by a top-mounted knob, allowing users to customize airflow.

Product Overview

Compact Vertical Airflow Solution

This 32-inch vertical tower fan is engineered for efficient air circulation in both home and office environments. Its space-saving, slim design makes it an ideal choice for rooms with limited floor space, while the tight-grill construction ensures safe, blade-free operation. With three distinct power settings and optional features like a timer and remote control, this unit provides customizable comfort and energy-efficient cooling.
