

Vertical and Horizontal Milling Machine

This versatile milling machine is designed for both vertical and horizontal machining operations. It features a robust construction for stability and precision, with a powerful motor for efficient material removal.

Machine Overview

Versatile Precision Milling & Drilling

The ZAY7550/1 is a high-performance milling and drilling machine engineered for professional workshop environments. Combining vertical and horizontal machining capabilities, it provides exceptional flexibility for complex metalworking tasks. Featuring a robust cast iron frame, integrated coolant systems, and advanced digital readout precision, this machine is built to maintain stability and accuracy under demanding operational conditions.

Model Number	ZAY7550/1
--------------	-----------

Technical Features

Worktable Specifications

Adjustable Worktable • T-Slot Clamping

Key Capabilities	Vertical Milling, Horizontal Milling, Drilling, Digital Readout, Variable Speed, Coolant System
------------------	---

Body Material	Cast Iron
---------------	-----------

Safety & Control

Safety Equipment

- Emergency stop button
- Interlocked guards
- Instruction manual integration
