Product Overview

High-Performance Axial Cam Pumps

These residential-grade vertical shift axial cam pumps are engineered for durability, consistent pressure, and reliable cleaning performance. Featuring advanced pump technology and a compact design, they offer easy installation and seamless integration into various pressure washing systems. The robust construction ensures reduced wear and an extended operational lifespan for your equipment.

Performance Specifications

Model Specifications

Model	Max Pressure	Rated Pressure	Rated Flow	Required HP
QGX-49F	170 bar	130 bar	7 L/min	4.0 HP
QGX-49D	180 bar	140 bar	8 L/min	5.5 HP
QGX-49G	200 bar	150 bar	8 L/min	5.5-6.5 HP

Technical Details

Pump Head Material	Aluminum
Design Features	Vertical Shift, Axial Cam, Compact Design, Residential Application
