

Vertical CNC Machining Center

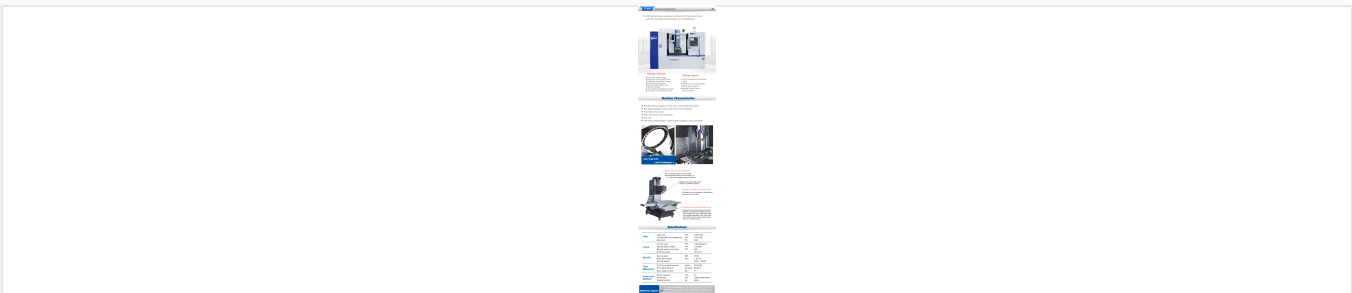

This vertical machining center is designed for precision metal cutting. It features a multi-axis control system for complex part geometries and a user-friendly interface for programming and monitoring.

Overview

High-quality machining center designed for professional metal cutting applications.

High-Performance Vertical Machining Center

This vertical machining center is designed for precision metal cutting, offering a robust structure for stability and high-speed operations. It features an automated tool changer, ergonomic CNC controls, and advanced linear guideways to ensure productivity in mold making, automotive, and aerospace manufacturing environments. Its compact design optimizes floor space without compromising on performance or accuracy.

Key Metrics

Performance Highlights

1050 mm
X-Axis Travel

8000 rpm
Spindle Speed

6800 kg
Machine Weight

Technical Specifications

Machining Capacity

Parameter	Value
Table Size	1300x520 mm
Max Load	600 kg
Travel (X/Y/Z)	1050/500/670 mm
Spindle Type	BT40

System Capabilities

- Automatic Tool Changer (24 positions)
- Direct drive servo motors on all axes
- Automatic lubrication system
- Full machine enclosure with safety lock
- Precision linear guideways on X/Y/Z

Certifications & Compliance

Compliance	CE Certified
