

# Vertical Fall Arrest Lifeline

This vertical lifeline provides a secure and reliable fall protection system for workers at heights. It features a durable, high-strength rope and a rope grab mechanism for smooth movement and automatic locking in case of a fall.

## Product Overview

### Professional Vertical Fall Arrest System

This high-strength vertical fall arrest lifeline is designed for secure height operations, featuring a durable polyamide rope construction. The system includes an integrated energy absorber to mitigate impact forces and a reliable sliding rope grab mechanism for enhanced safety. Engineered for durability and abrasion resistance, it provides an essential fall protection solution for workers in industrial and climbing environments.

## Technical Specifications

Rope Length	15.24 M
Rope Diameter	14 mm
Material	Polyamide
Color	Yellow, Black

## System Components

### Kit Components

- 1x Rope Grab
- 1x Snap Hook
- 1x Energy Absorber
