

Vertical Fan Coil Unit for HVAC Systems

This vertical fan coil unit provides efficient heating and cooling. It features a louvered air outlet for optimal air distribution and multi-speed control for customized comfort.

General Overview

Professional Vertical HVAC Solutions

This vertical fan coil unit is engineered for efficient climate control in both residential and commercial settings. Featuring a durable metal housing with a minimalist design, it ensures reliable heat transfer through high-efficiency seamless copper piping and aluminum blinds-fin construction. Each unit undergoes rigorous 20 kg/cm² pressure testing to guarantee peak performance and leak-free operation.

Certifications

CE

Technical Specifications

Cooling Capacity Measurement Conditions

- Indoor Temp: DB 27°C / WB 19.5°C
- Water Inlet Temp: 7°C
- Temp Difference (Inlet/Outlet): 5°C

Heating Capacity Measurement Conditions

- Indoor Temp: DB 21°C
- Water Inlet Temp: 60°C
- Temp Difference (Inlet/Outlet): 10°C

Pressure Leak Test

20 kg/cm²

Features

Core Product Features

Fire Insulation • High Efficiency • Lightweight Design • Seamless Copper Pipes • Easy Installation
