

Vertical Fine Boring and Milling Machine

This vertical fine boring and milling machine is designed for precision machining operations. It features a robust construction with a vertical head and a large worktable, providing stability and ample space for various workpieces.

Overview

Precision Vertical Fine Boring and Milling

The T7220C is a robust vertical fine boring and milling machine engineered for high-precision metal machining. It features a stable vertical head design and a spacious worktable, providing the necessary rigidity for complex industrial operations. This model is equipped with precise manual controls, ensuring accuracy in both boring and milling tasks for various metal components.

Technical Specifications

Model Number	T7220C
Machine Type	Vertical Boring, Milling Machine

Operational Details

Included Accessories

- Tool holders
- Cutting tools

Control System	Manual controls for precise adjustments and movements
----------------	---
