

Vertical Form Fill Seal Machine

This vertical form fill seal (VFFS) machine automates the packaging of diverse products. It is equipped with a film roll holder, forming collar, sealing jaws, and a control panel for parameter adjustments.

Overview

Automated Vertical Packaging Solution

This Vertical Form Fill Seal (VFFS) machine is designed for high-efficiency automated packaging of diverse product types. It integrates essential components like a film roll holder, forming collar, and precision sealing jaws to create consistent pouches or bags. Ideal for industrial applications, it offers flexible parameter adjustments via an intuitive control panel to accommodate granular, powder, and liquid goods.

Technical Features

Key Components

- Film roll holder
- Forming collar
- Sealing jaws
- Integrated control panel

Application

Packaging Format

Pouches • Bags

Suitable Product Types

Granular, Powder, Liquid
