

Vertical Form Fill Seal Machine

This vertical form fill seal (VFFS) machine automates packaging of various products. It is suitable for packaging granular, powder, and liquid products into pouches or bags.

Overview

Automated Vertical Packaging Solution

This Vertical Form Fill Seal (VFFS) machine offers a highly efficient, automated solution for packaging a wide variety of products. Engineered with durable stainless steel components, it ensures hygiene and longevity, making it suitable for granular, powder, and liquid applications. The integrated control panel with a digital display provides precise operation, while the mobile design allows for flexible placement within your production environment.

Technical Specifications

Key Components

- Film roll holder
- Forming collar
- Sealing jaws
- Control panel with digital display

Construction Material	Stainless Steel
Mobility	Yes

Applications

Packaging Formats

Pouches • Bags

Suitable Product Types	Granular, Powder, Liquid
