Overview

Automated Packaging Solution

This Vertical Form Fill Seal (VFFS) machine is engineered for the efficient, automated packaging of granular and powdered products. Built with durable stainless steel, it features precise volumetric or multi-lane filling systems and an integrated electronic control panel for easy parameter adjustments. Designed for versatility, this machine is suitable for food, chemical, and pharmaceutical applications, offering adjustable bag dimensions and enhanced safety features.

Technical Specifications

Filling System Options

- Volumetric filling with conical hopper
- Multi-lane dispensing system

Machine Type	Vertical Form Fill Seal (VFFS)
Construction Material	Stainless Steel
Mobility	Yes

Performance & Features

Suitable Industries

Food Industry • Chemicals • Pharmaceuticals

Key Features

Automated Packaging, Adjustable Bag Dimensions, Digital Control Panel, Safety Enclosure
