

# Vertical Hydraulic Log Splitter

This vertical log splitter is engineered for efficient firewood processing. It utilizes a hydraulic system powered by an electric motor to provide significant splitting force.

## Product Overview

### Professional Vertical Log Splitter

This high-performance vertical hydraulic log splitter is engineered for efficient and safe firewood processing. Designed with a robust steel frame and a powerful electric motor, it handles demanding splitting tasks with ease. The vertical configuration simplifies log loading, while the two-hand control system and integrated hand guards ensure operator safety during operation.

## Performance Metrics

### Splitting Force

**10 tons**

Splitting Force

## Technical Specifications

### Safety Equipment

- Integrated hand guards
- Two-hand control system

### Key Features

Hydraulic System, Electric Motor, Two-Hand Control, Portable, Steel Frame

### Portability

Yes
