

Vertical Hydraulic Oil Press

This vertical hydraulic oil press is engineered for efficient oil extraction from various seeds and nuts. It utilizes a hydraulic system to apply high pressure, ensuring maximum oil yield.

Product Overview

High-Efficiency Vertical Hydraulic Oil Press

The ZLY-90 Vertical Hydraulic Oil Press is engineered for precision oil extraction from a diverse range of seeds and nuts. By utilizing a powerful hydraulic system, this machine applies consistent, high-pressure force to ensure maximum yield in every batch. Its space-saving vertical architecture is specifically designed for seamless operation within small to medium-scale professional production facilities.

Performance Highlights

90 Model

Series Designation

Construction and Design

Key Features

Vertical Design, Hydraulic Extraction, Heavy-duty Construction, Space Optimized

Applications

Target Environment

- Small-scale oil production
- Medium-scale oil production
- Seed oil extraction
- Nut oil extraction
