

Vertical Inline Centrifugal Pump for Fluid Transfer

This vertical inline centrifugal pump is designed for efficient fluid transfer in various industrial applications. Its compact footprint and reliable performance make it suitable for HVAC, water supply, and industrial processes.

Product Overview

High-Efficiency Vertical Inline Centrifugal Pump

This vertical inline centrifugal pump is engineered for reliable fluid transfer and consistent performance in demanding industrial and residential environments. Featuring a robust cast iron construction and high-quality mechanical seals, it offers long-lasting durability and smooth operation. The compact vertical design ensures high efficiency, energy savings, and ease of installation in space-constrained systems.

Technical Specifications

Insulation Class	Class B
Protection Grade	IP54
Pump Body Material	Cast Iron
Supported Voltages	220V/50Hz (Single-Phase), 380V/50Hz

Operating Conditions

Operating Temperature Range	5°C to 60°C
Maximum Altitude	1000 m

Certifications

Compliance

3C China Compulsory Certification

Applications

Typical Applications

- Residential pressurized water supply
- High-rise building pressurization
- Industrial water supply
- Central air conditioning cooling systems
- Hot water delivery
