

Vertical Inline Centrifugal Water Pump

This vertical inline centrifugal pump is engineered for efficient water transfer. Its design features a direct-coupled electric motor and flanged connections for easy installation.

Product Overview

Versatile Industrial Performance

This vertical inline centrifugal water pump is engineered for high-efficiency fluid transfer across a wide array of applications, including industrial, commercial, and agricultural systems. The robust electric motor is directly coupled to the pump housing to ensure reliable operation and minimized maintenance. Featuring a compact vertical design and standard flanged connections, this unit is built for seamless integration into existing piping infrastructures.

Technical Specifications

Pump Configuration	Vertical Inline
Installation	Flanged connection
Suitable Industries	Industrial, Commercial, Agricultural
