

Vertical Inline Centrifugal Water Pump

This vertical inline centrifugal pump is designed for fluid transfer. It has flanged connections and an efficient impeller.

Product Overview

Industrial Fluid Transfer Solution

This vertical inline centrifugal pump is engineered for demanding industrial, agricultural, and municipal fluid transfer applications. Featuring a robust cast iron housing and efficient impeller design, it ensures reliable performance for pressure boosting and circulation duties. Its vertical inline configuration allows for streamlined installation, making it an ideal choice for space-constrained environments requiring secure, flanged piping connections.

Technical Details

Pump Type	Vertical Inline Centrifugal
Housing Material	Cast Iron
Connection Type	Flanged

Performance

Core Benefits	Pressure Boosting, Fluid Circulation, Durable Construction, Vertical Installation
---------------	---

Applications

Suitable Sectors

- Industrial Water Systems
- Agricultural Irrigation
- Municipal Fluid Transfer
